**2. Signs and Markers**

There is a new sign at the entry to the sedimentation-pond access road. It is farther from the main road and turned parallel to the access road, so it is not as visible from the main road. It is hoped this will reduce use of the sign as a target for shooters.

**4.b Hydrologic Balance: Sediment Ponds and Impoundments**

The pond was inspected on September 22, 2004, by John Christensen, PE. Sediment capacity is 2.0 acre-feet, current sediment volume is 1.6 acre-feet, so remaining capacity is 0.4 acre-feet.

**4.d Hydrologic Balance: Water Monitoring**

The outflow of the sedimentation pond is the only water-monitoring point. The DMR for August showed no discharge. The September DMR has not been filed with DWQ yet.

**9. Protection of Fish, Wildlife and Related Environmental Issues**

Deer tracks and chipmunks were seen on-site during the inspection. There was also scat, not definitely identified but possibly coyote.
